

Introducing the new **AeroFlex 2012**.

A proven winner made better.

**REVOLUTIONARY...
INNOVATIVE...
7% FUEL SAVINGS.**

Now Even Lighter and More Affordable

The AeroFlex 2012 is Freight Wing's new lightweight side skirt. Like the classic AeroFlex, the AeroFlex 2012 uses the same EPA SmartWay-verified geometry producing 7% fuel savings, while offering lower weight and cost.

Building on three years of on-road experience with hundreds of millions of miles of proven reliability, the AeroFlex 2012 sets a new standard for skirting performance, durability, and lifespan.

Tried, Tested and Approved

- EPA SmartWay/CARB approved
- 7.45% Fuel Savings in SAE/TMC J1321 testing by independent third party
- Save over 400 gallons of fuel every 50,000 miles of trailer operation
- New proprietary flexible plastic panels maximize durability for the life of your trailer

Improved Design

The AeroFlex 2012 has been built to last! New features include more resilient support rods, increased flexibility, proprietary engineered plastic, and a simplified clamping system. Over a year of testing and design has resulted in a significant decrease in unit weight, while increasing road life and durability. Simply put the AeroFlex 2012 is designed to maximize your return on investment for the long haul.

The AeroFlex 2012 - brought to you by

FREIGHT WING

THE INDUSTRY LEADERS IN AERODYNAMIC SKIRTING PERFORMANCE

Construction & Materials

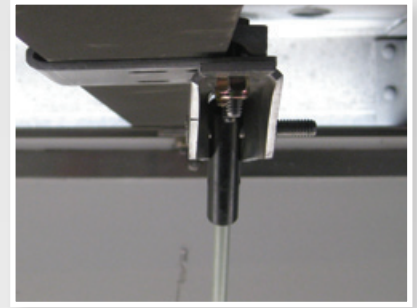

The AeroFlex 2012 is manufactured from Dense Matrix Polyethylene (DMP) using a unique formulation proprietary to Freight Wing and developed specifically for trailer skirting. Freight Wing's new plastic has proven to be durable, flexible, and well suited to the most demanding fleet operations. DMP is UV resistant - so it will not fade or crack - and provides a great looking gloss surface finish that is easy to clean. Unlike the fiberglass used by competitors, it will not crack or delaminate when dragged over pavement in low clearance situations.

The AeroFlex 2012 attaches with a new simple and easy-to-learn clamp-on mounting system.

Flexible, Durable Dense Matrix Polyethylene (DMP):

The AeroFlex 2012 is designed to be flexible and durable enough to withstand the day to day operational concerns trailer skirts run into.

Fast, new clamping system

Features & Benefits

- Road-tested flexibility, durability, and reliability let you reap the rewards of trouble free ownership!
- Proven 7% fuel savings will pay for the AeroFlex 2012 in less than 50,000 miles of trailer operation.
- EPA SmartWay-verified and compliant with California's Air Resource Board (CARB) regulations.
- The lightest skirt on the market at 150 lbs installed - less weight = more payload!
- Pressure-responsive support rod system keeps the skirt in the aerodynamic position while providing maximum flexibility to absorb both side and ground impacts.
- DMP panels are easily cut with a jig-saw or hole saw making clean cutouts for reefer tank access and other customization.
- Easy to install mounting system is designed to avoid maintenance problems.

Pressure responsive support rod system

Simple and easy installation

Additional Options

- Advertising & Graphics Package: Graphics and text printed on the side skirt can be used for advertising, public relations, and more. Fleets can use this to recruit drivers, promote their "green" efforts, advertise their company's products, sports marketing, and more.
- Lease Program: Call today to find out about our leasing program - let the fuel savings pay for your AeroFlex 2012 lease payments.
- Choose from white or black stock colors, with custom color also available.

Graphics can be printed on the AeroFlex 2012

New 2012 Gap Fairing

- Add an additional 2% fuel savings with our Gap Fairing
- New lower cost and impact resistant plastic panel design
